

PRE-RELEASE INFORMATION

MK II Plus / Lite

The new Comb intercom with way, way more...IoT

When improvement on a leader in the field is considered, it's hard to imagine better or more for your needs. *Comb have however done just that.* Enhancing the standard by which you perceive and manage Access Control and its associated communications.

Introducing the **MK II Plus** and **MK II Lite**, the next generation smart intercom that gives you all the control you are accustomed to, *and more... and more... and more!*

An entirely new foundation in the form of a redesigned, more robust and significantly improved PC board, providing you with control over your environment along with integration on several current and new technologies. What's *more...* Sync with our brand new bespoke facilities management platform and unleash it's full potential. Comb Portal is the powerful web based application that puts control right at your fingertips and will change the way in which you manage your estate or business park into the future.

Major improvements include...

- Addition of relay for controlling more points
- Real time updates
- Additional Tap-Tap channel
- 3G modem, LTE ready
- Improved audio quality
- Tamper detection
- Fibre ready (Ethernet port) +USB*
- SD Card slot for larger memory capacity*
- Audible feedback on keypad
