

A new way at looking how to manage your license fees and subscriptions.

We have designed and developed a new way to managing your license fees and subscriptions which will provide features such as: switching between monthly and yearly billing cycles, billing estimates, a cost calculator for projecting expected costs with easy 'one-click to activate' functionality and much more!

You have spoken, we have listened!

Easily manage your license fees and subscriptions with our new user-friendly design that is based on customers feedback. Listed below are some of the new features.

Improved user understanding design

We have categorised our license packages and modules to make them easy to read and understand.

Monthly & yearly Billing

Manage your billing cycles by easily switching between monthly and yearly billing.

Easily manage products

Easily manage your active subscriptions and modules by enabling and disabling packages.

View all active Subscriptions

Know your costs by viewing all your active subscriptions (yearly and monthly) in one component.

Daily scheduler

A daily scheduler runs every 24 hours which will automatically update any changes made to your packages.

Costs calculator

Play around and project expected costs of subscriptions for your monthly and yearly billing costs.

Bill History

Keep track of all payments made to Comb Communications by viewing your organisations bill history

Cost Estimates

View your organisations estimated costs for the next month and yearly cycle.
