

Checking operating system version (32 or 64 bit)

1. Open up “My Computer”.
2. Right click anywhere and select the “Properties” option.

3. Your operating system version (32 or 64 bit) will be indicated under the “System type” heading as indicated below. Please remember your operating system version as it will be needed for the Java and BTLoader downloads. (Your device might indicate x86 bit, that means your device is 32 bit)

Download Java for your operating system version (32 or 64 bit).

Click the buttons below to download Java for your operating system. Alternatively you can copy the links below and paste them in your web browser.

Download Java: 32bit

Alternatively visit: http://83.103.170.157/apps/java/jdk_1.8/jdk/jdk-8u202-windows-i586.exe

Download Java: 64bit

Alternatively visit: http://83.103.170.157/apps/java/jdk_1.8/jdk/jdk-8u202-windows-x64.exe

Download the Comb Biometric reader driver.

Click the buttons below to download the Comb biometric reader driver for your operating system. Alternatively you can copy the links below and paste them in your web browser.

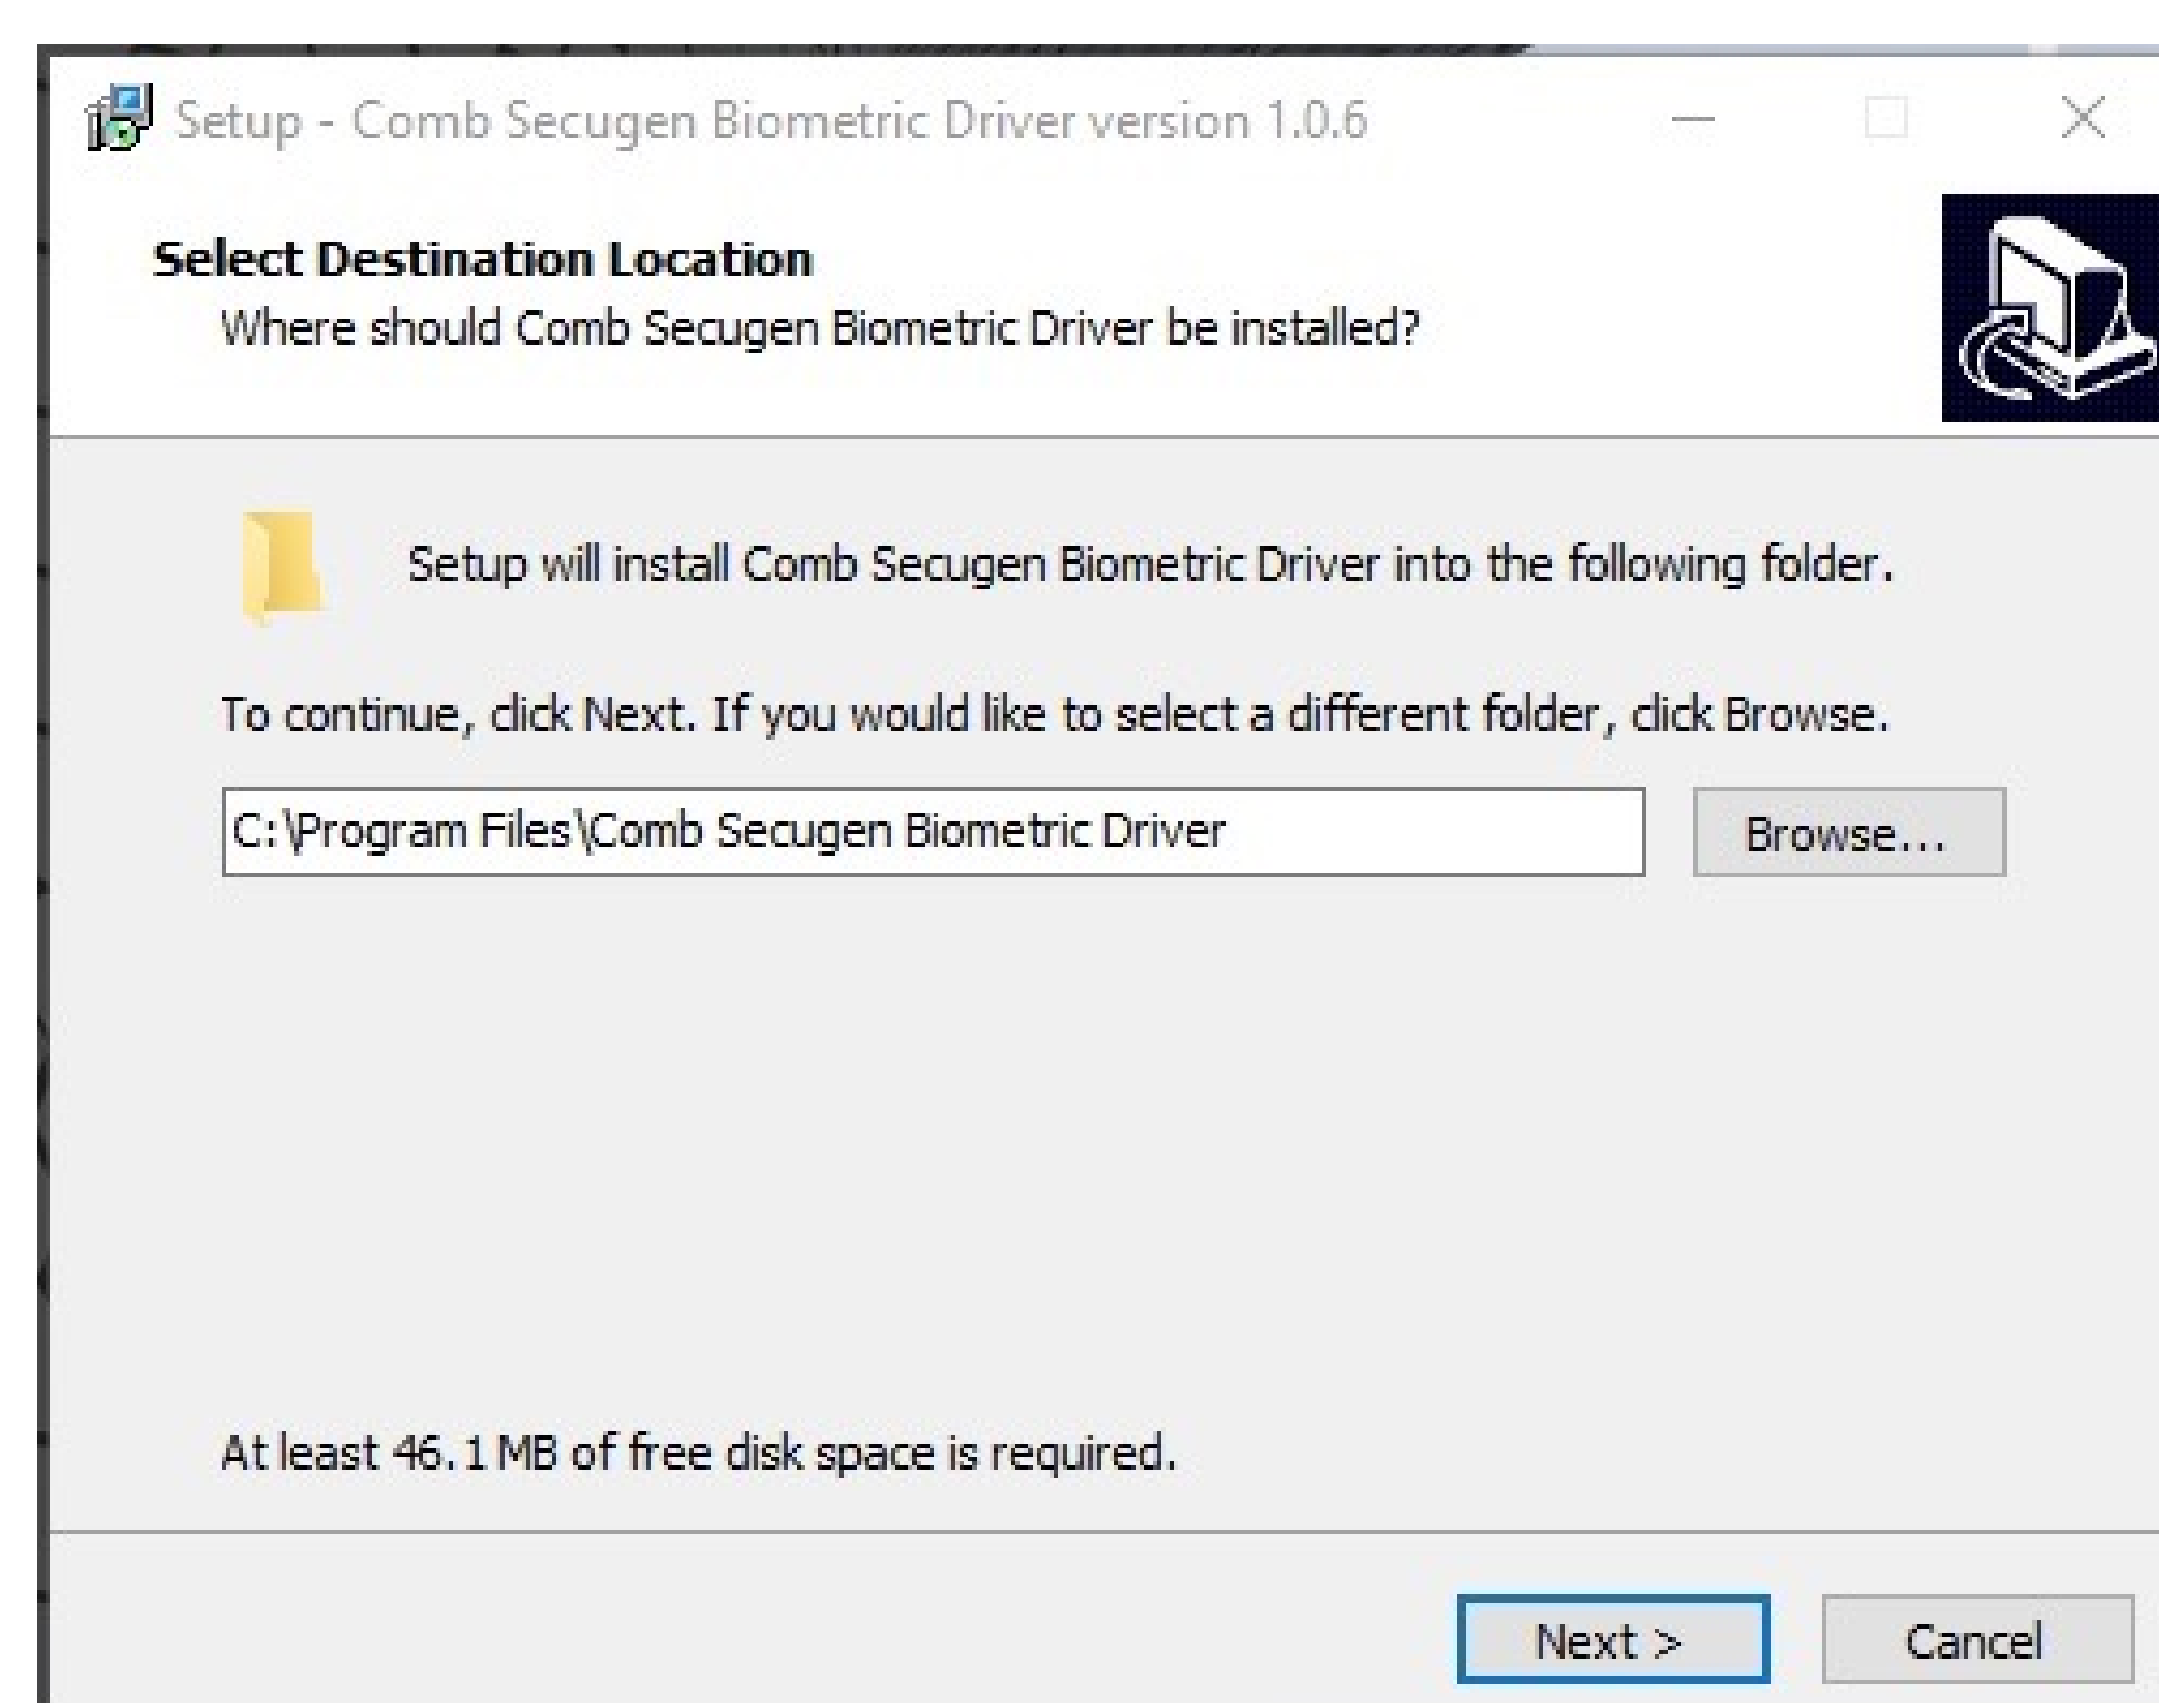

Download Comb Bio driver: 32bit

<https://drive.google.com/uc?export=download&id=1V3YZBPQEQoOBfIPU6U5bJmmLwsZDJv2R>

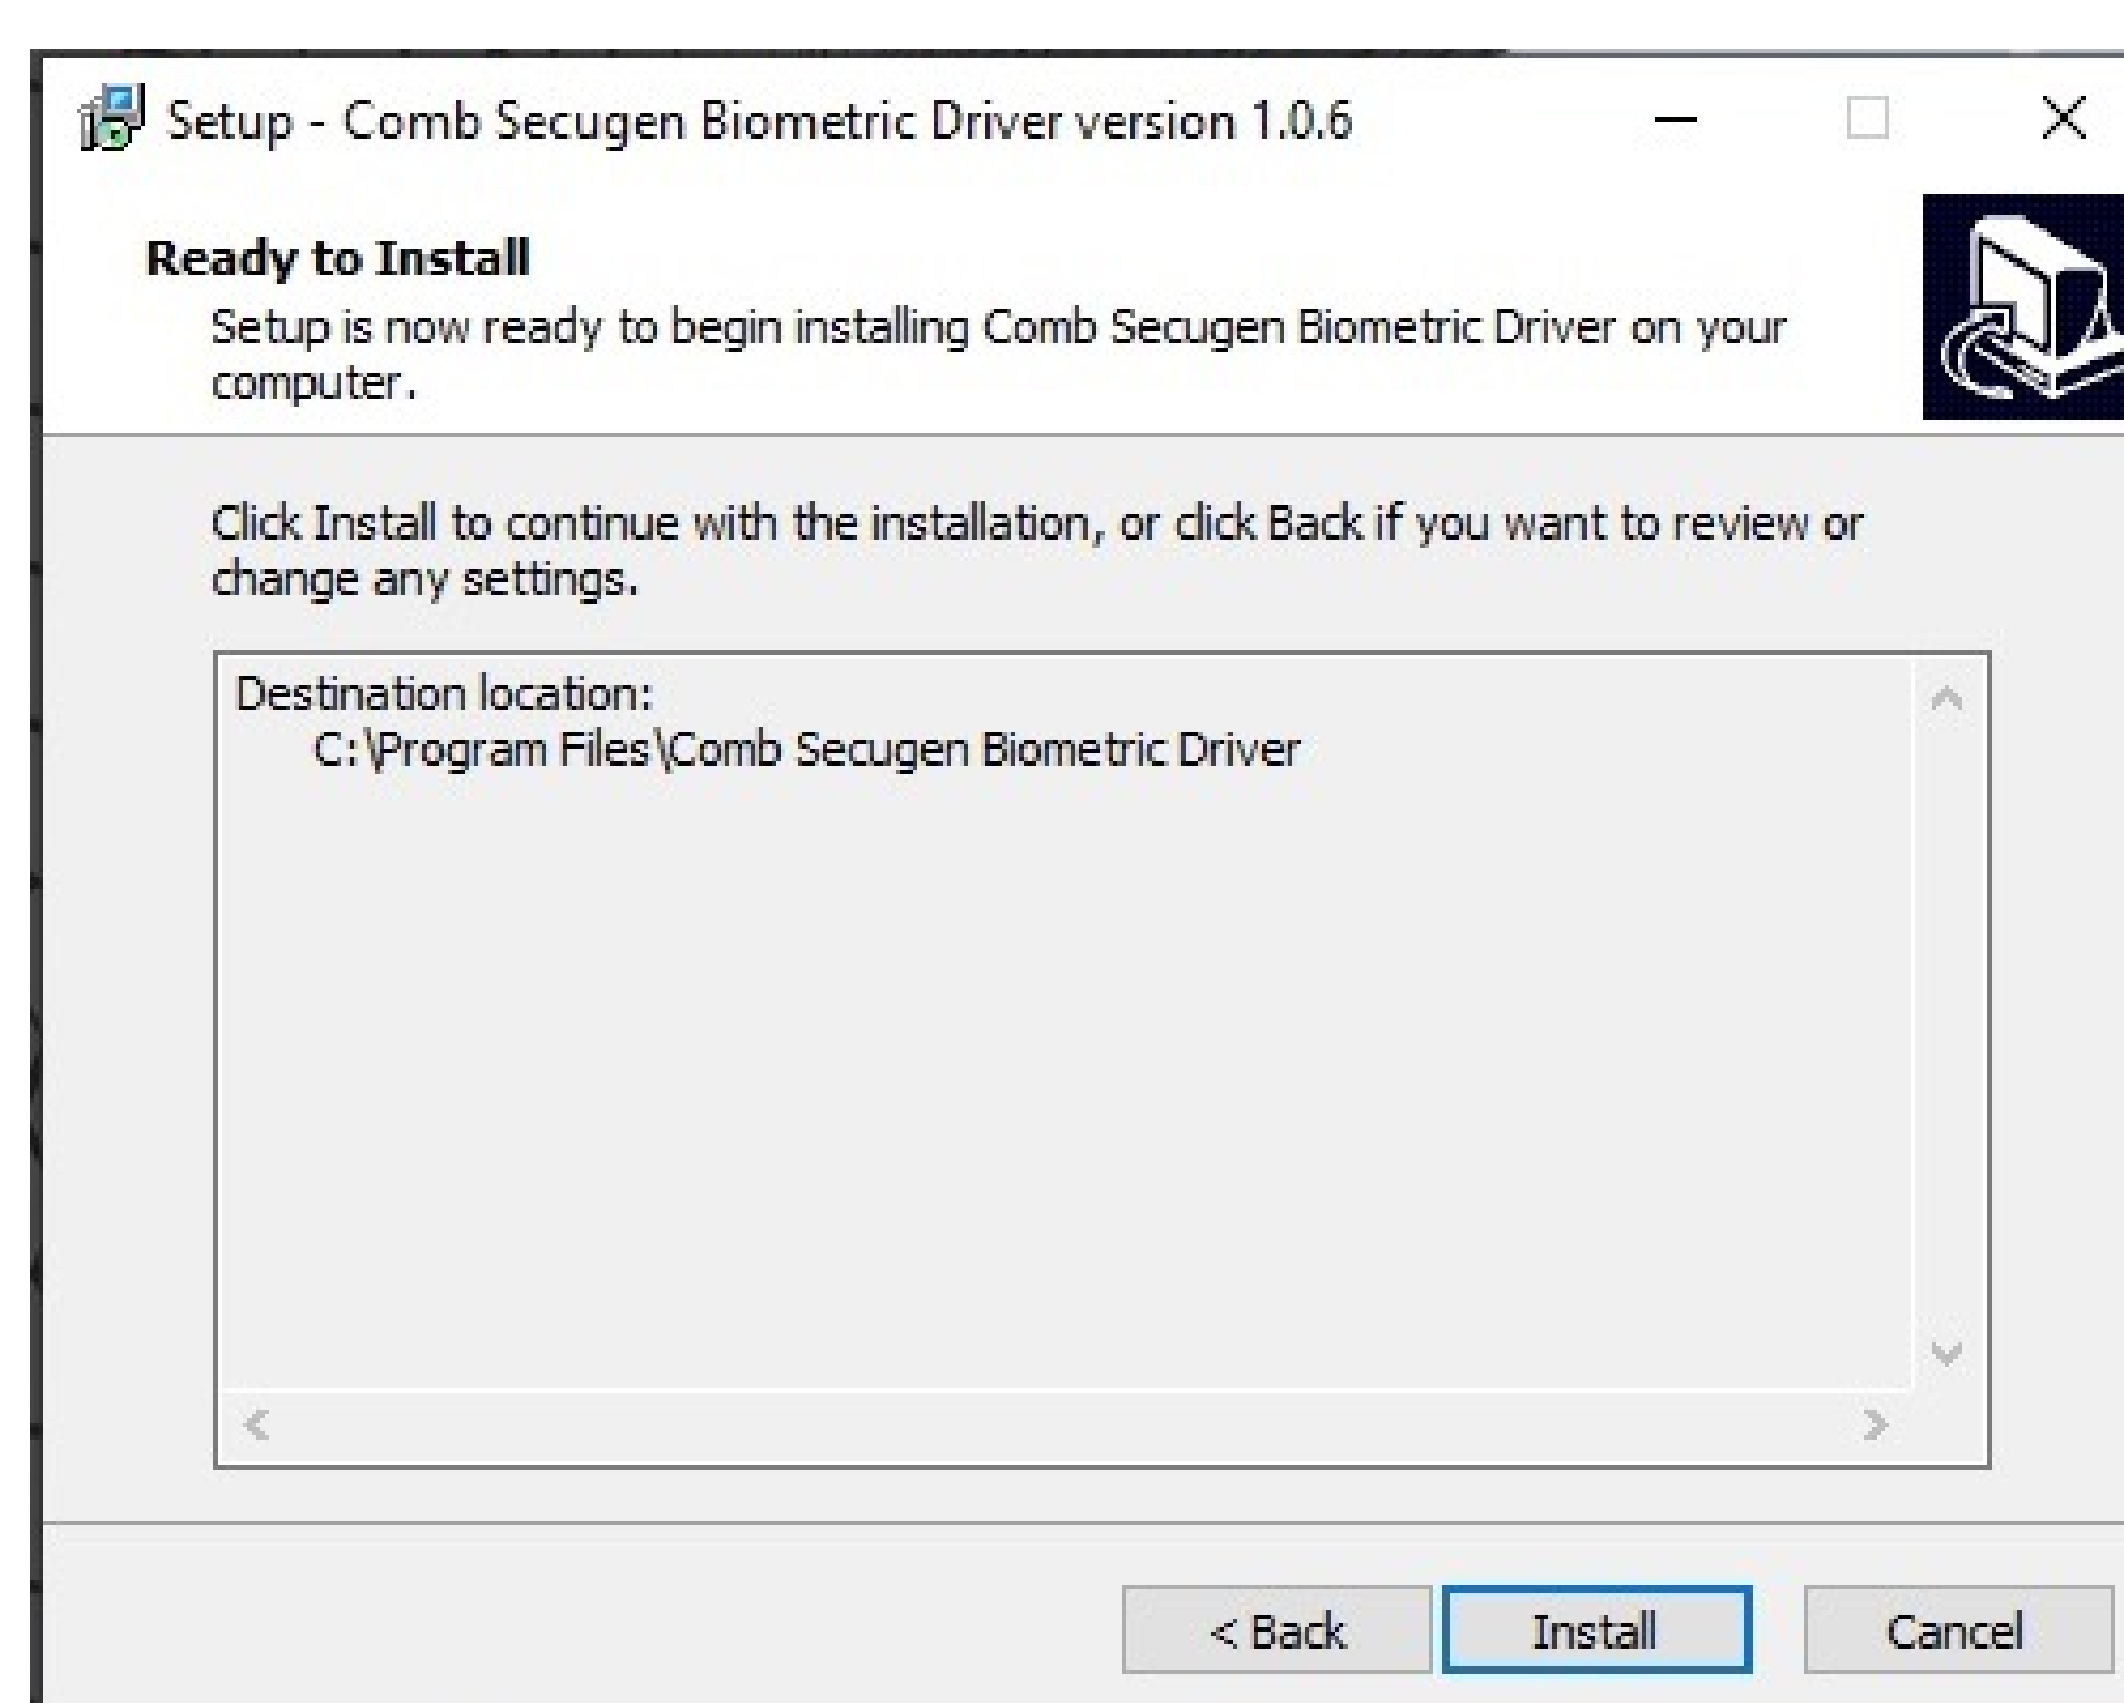

Download Comb Bio driver: 64bit

<https://drive.google.com/uc?export=download&id=1OKRVdLFUCtlv567S-8FCSrznEO-1oERk>

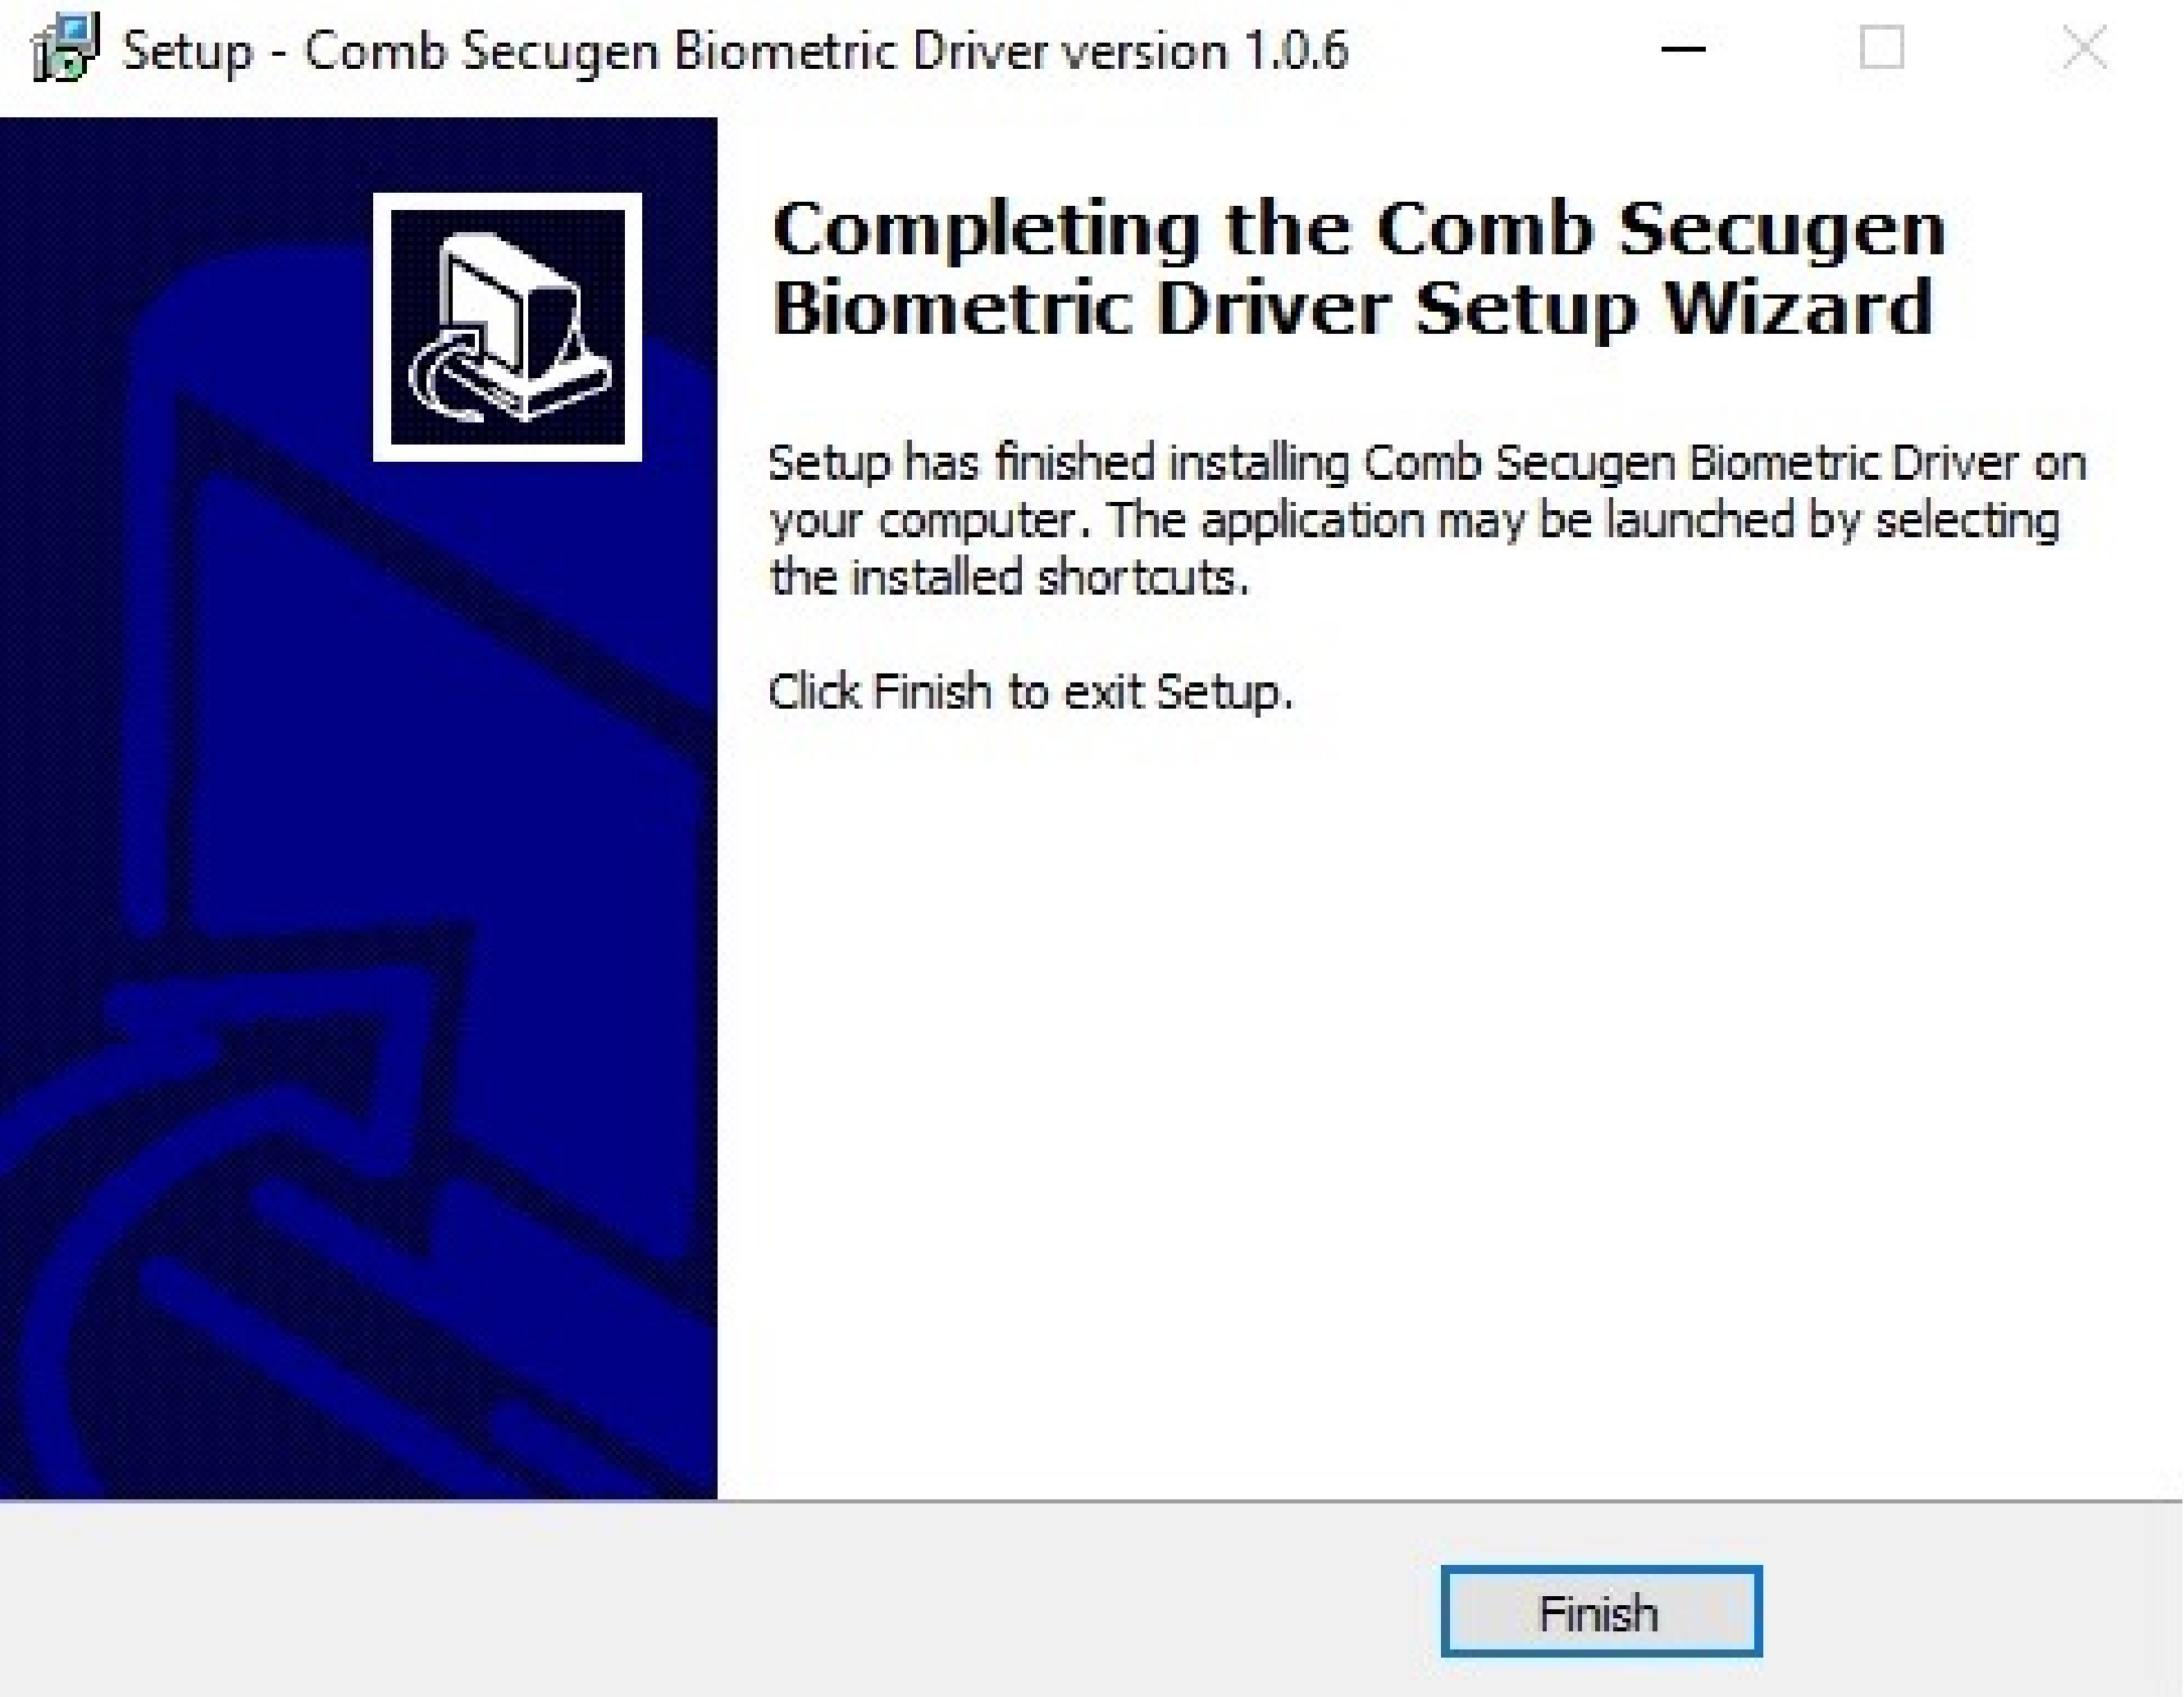

Once you have downloaded the Comb Bio driver, open and install the software as indicated below.

Congratulations, you have successfully installed all the required drivers, you can now continue and start registering users fingerprints via the Comb Portal.

How to register biometric fingerprints on Comb Portal

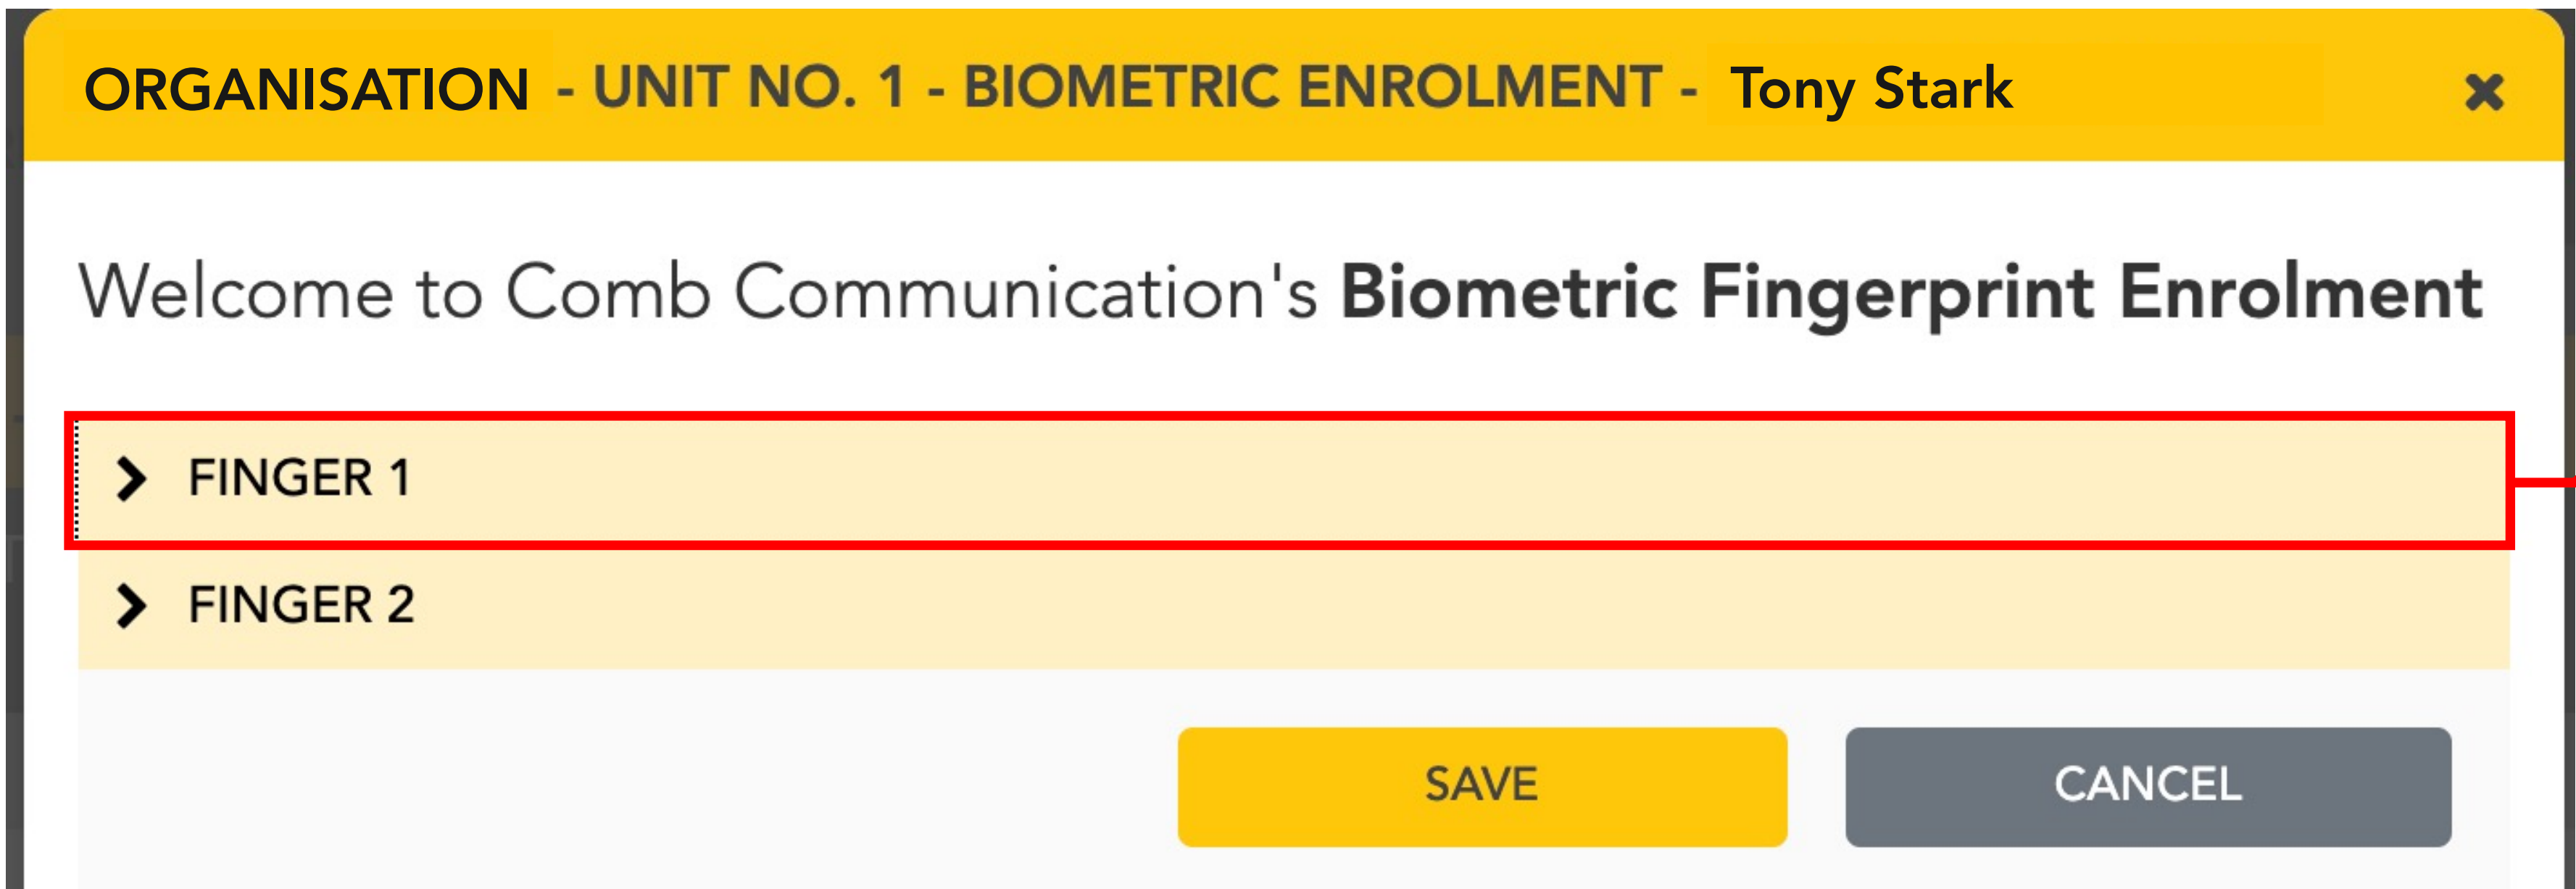

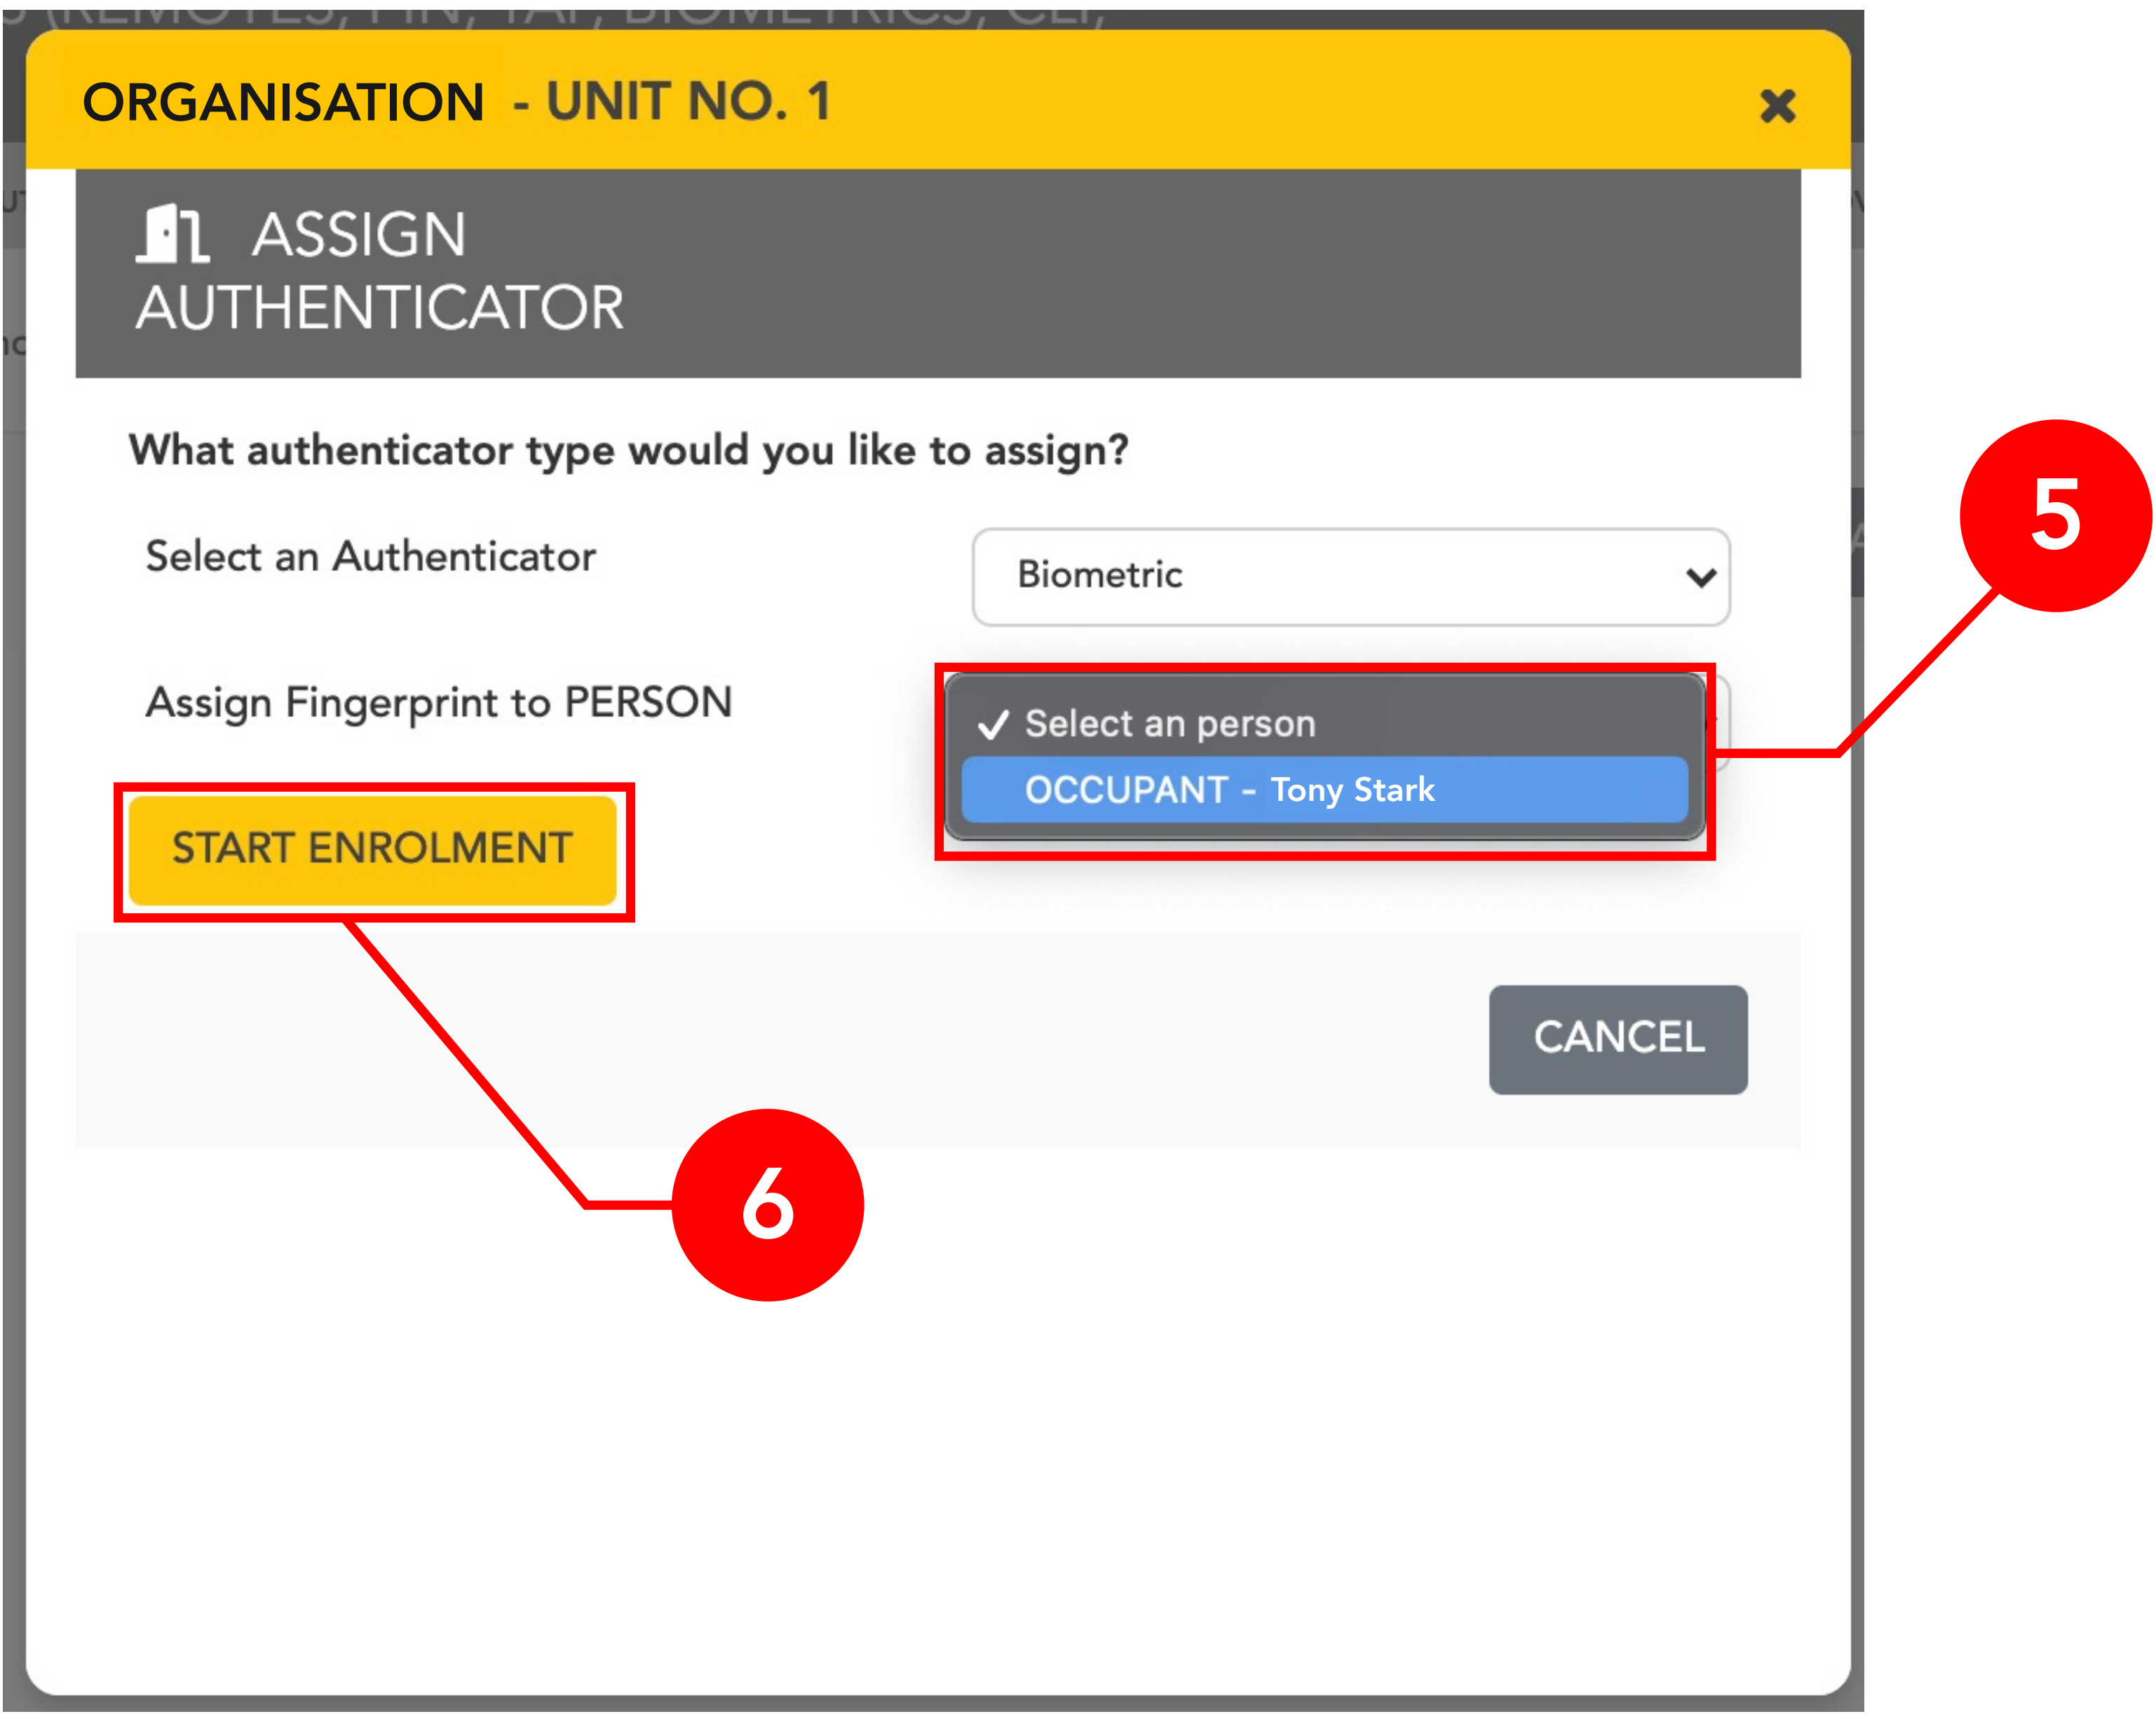

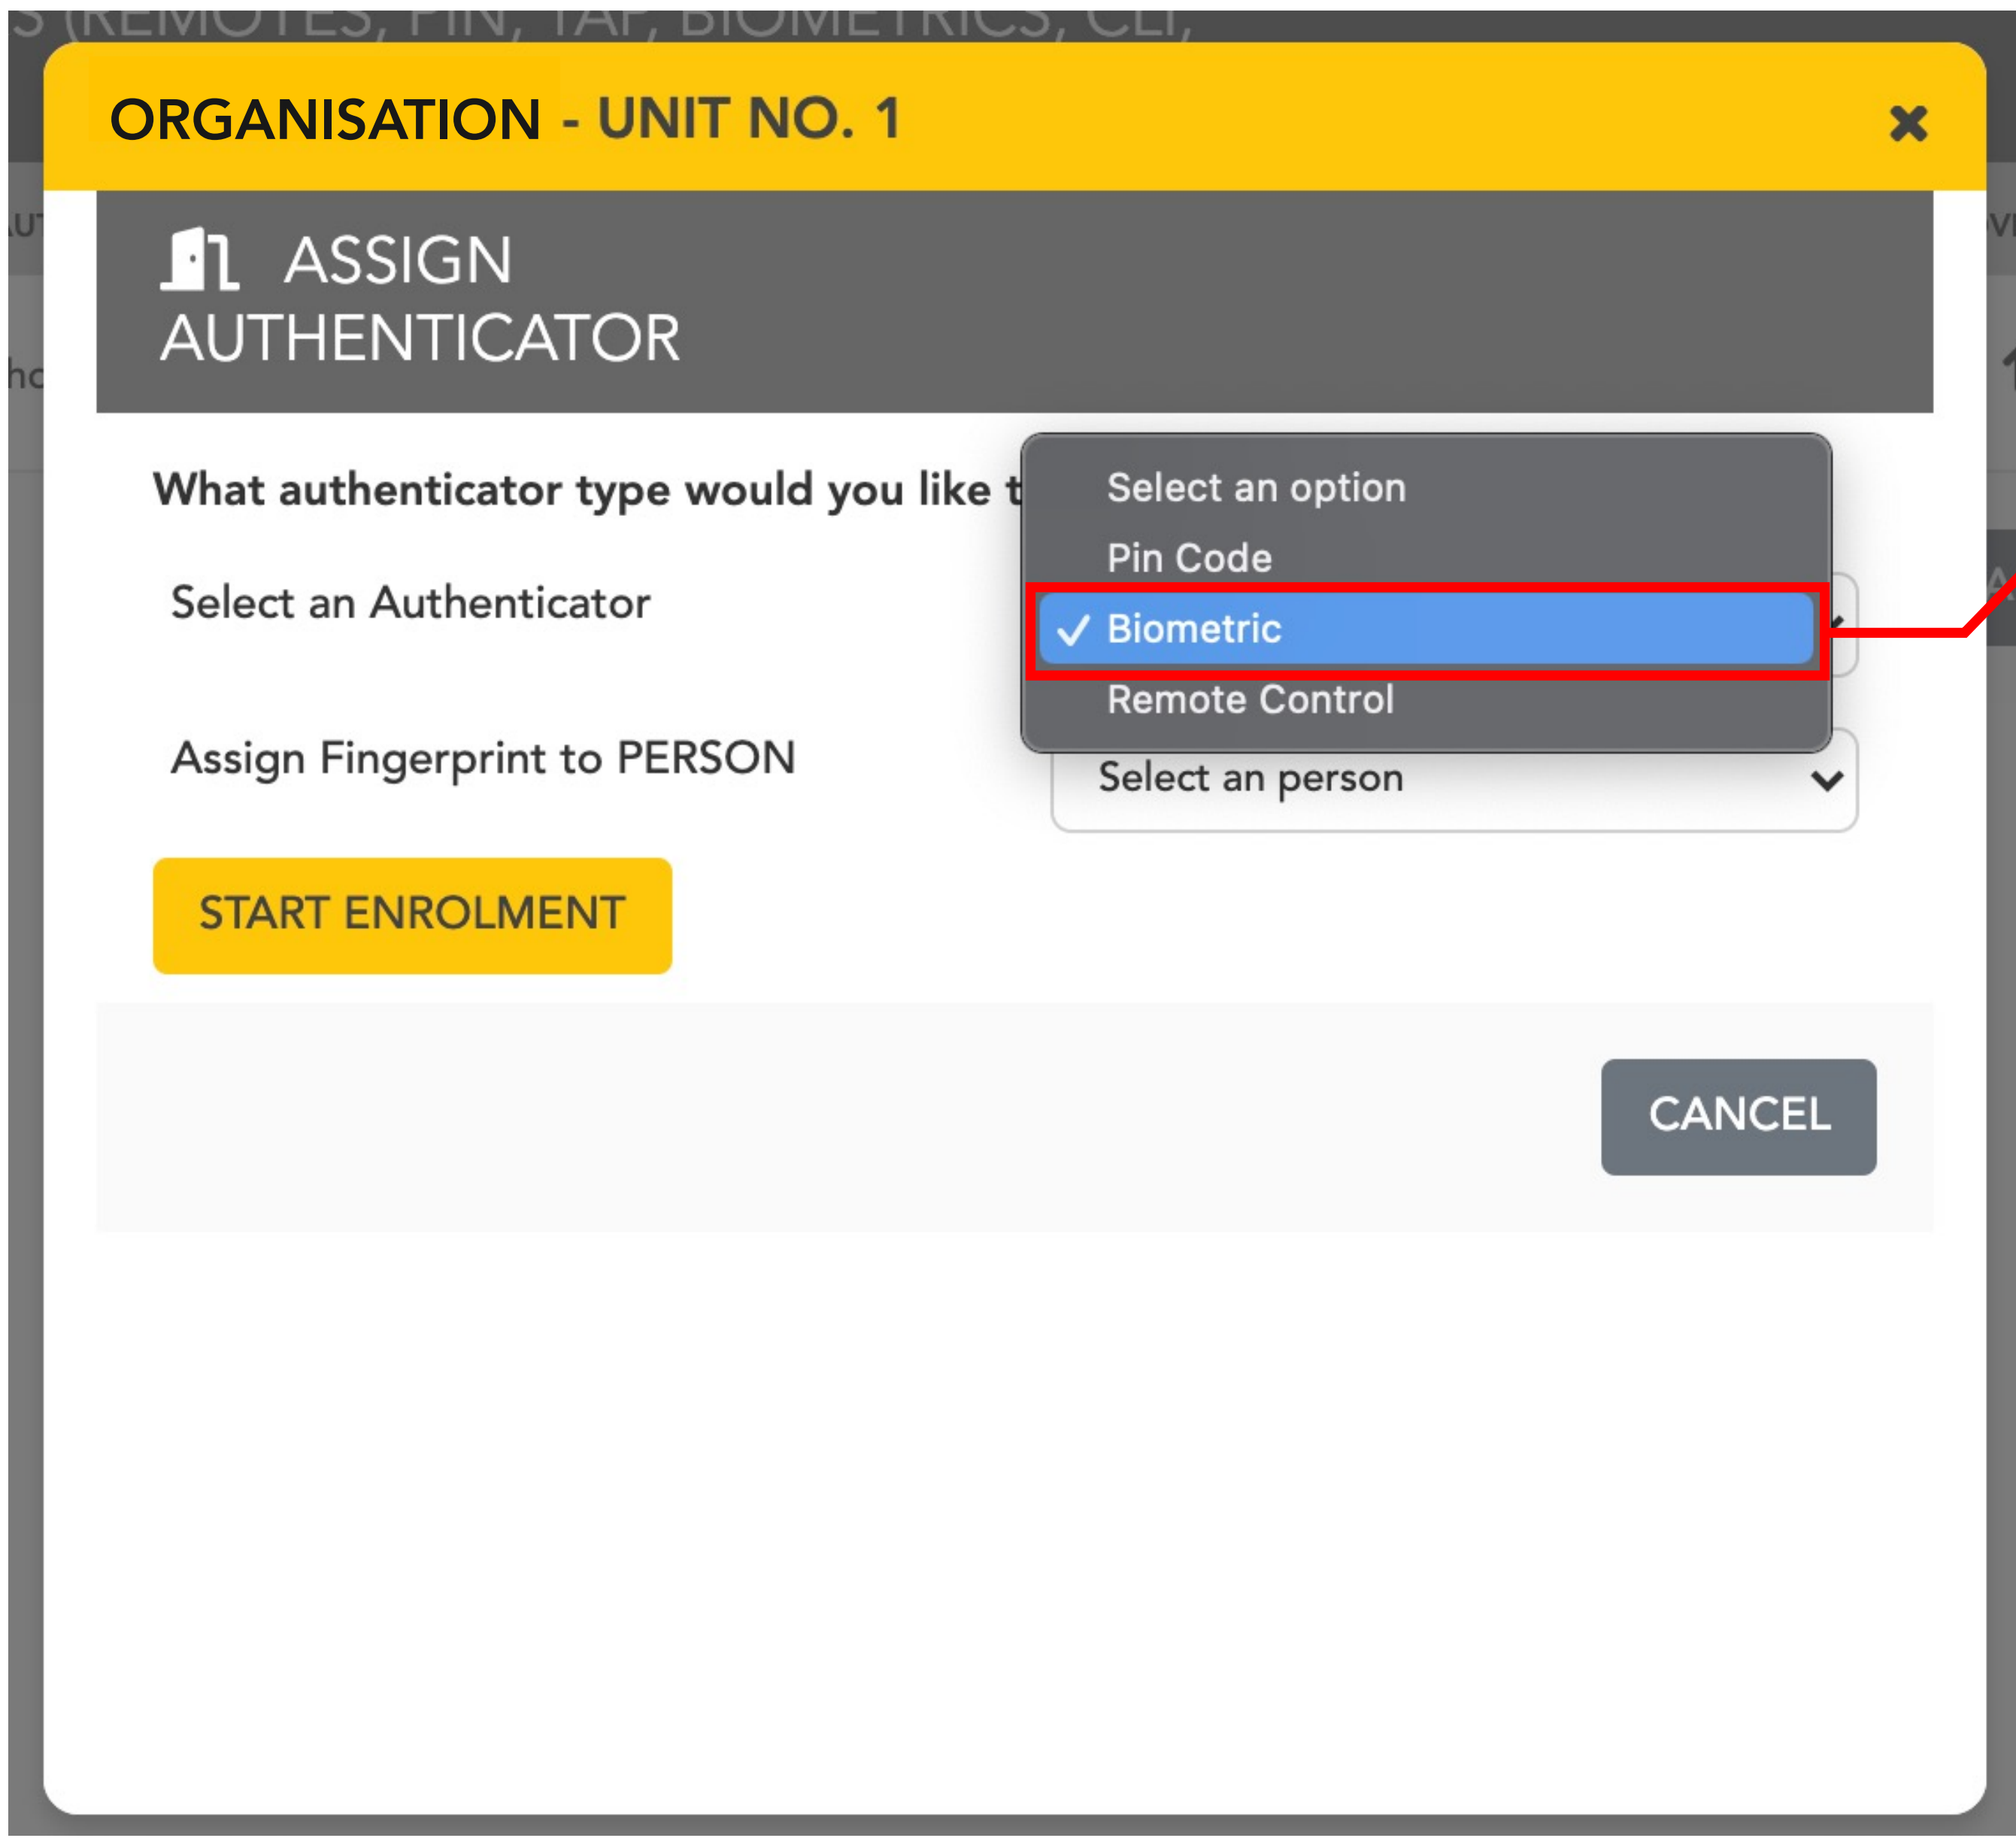

- 1: Log into the Comb Portal and navigate to the “Units” page from the side menu.
- 2: Locate the unit of the occupant/owner who will be registering their fingerprint and click the Authenticators icon as indicated below.

3: Click the “+ADD” button and select “ADD AUTHENTICATOR” as indicated below.

- 4: A pop-up will open to assign a new Authenticator, start by selecting the “Biometric” authenticator.
- 5: Select the person from the unit who you would like to register the fingerprint for.
- 6: Once selected, click the “Start enrolment” button to continue.

7: The Biometric enrolment wizard will open where the user will be able to register his/her fingerprints. Start by clicking the “Finger 1” accordion as indicated.

**Users can register 2 fingers.*

- 8:** Users will need to scan the same fingerprint twice for improved match quality. Once the user is ready to scan their fingerprint, click the “Capture prints” button to start capturing.
- 9:** A pop-up will open, when you see the icon indicated below, place your finger on the fingerprint scanner until completed. Repeat step 8 to complete the users second fingerprint scan using the same finger.

- 10:** Once you have completed scanning your fingerprint twice, users will need to scan their finger one last time to verify that their fingerprint match works. Click the “Verify print for finger 1” button to start scanning the fingerprint. Once completed and successfully verified, click the **SAVE** button to apply and save the fingerprint.

Congratulations, You have successfully registered the users fingerprint!
