MyComb Mobile App

BROCHURE

The brand new MyComb mobile application will provide you seamless integration with our products allowing you to manage access to your organisation easily and efficiently from your phone.

We have taken your safety to the next level with our all-new real-time mobile application. Users will receive push notifications giving them instant information on the entry and exit of people who enter the organisations' access points. Your security is our main priority, let your phone tell you who enters and when!

Reoccurring license fees apply for web services. For more information you can visit www.comb-communications.com/license-fees/

OPEN GATES

Users can open their gate directly from their mobile phone using the App.

CREATE TAP-TAP CODES

Easily request a Temporary Access Pin for your visitors.

REAL-TIME NOTIFICATIONS

Know when visitors enter or exits your organisation by receiving notifications in real-time.

REPORTING

Keep track of who, when and how visitors enter your organisation. Filter through and easily back track to find specific events

MULTIPLE ORGANISATIONS

Users can be linked to and switched between to multiple organisations easily.
